PROFESSIONAL SUMMARY

Results-driven **AI Project & Operations Specialist** with 3+ years of experience leading technical teams, architecting enterprise-scale AI product lifecycles, and managing AWS cloud implementations. Proven track record of orchestrating cross-functional AI solution delivery, establishing AI governance and compliance frameworks, and translating complex machine learning requirements into actionable product milestones. Combines deep technical proficiency in NLP, computer vision, and foundation models with a strong background in instructional design and technical communication to align technical engineering with core business strategy.

TECHNICAL & MANAGEMENT SKILLS

• AI Project & Delivery Management:	Agile/Scrum Leadership, AI Product Lifecycle, Cross-Functional Team Management, Stakeholder Alignment, Requirements Gathering, KPI Definition, Quality Assurance & Evaluation Frameworks
• AI Operations & Governance:	AI Ethics & Regulatory Compliance, Prompt Architecture, RAG Pipeline Operations, Model Evaluation (Latency & Error Monitoring), Knowledge Management, Technical Documentation
• Machine Learning & Infrastructure:	AWS (Bedrock, SageMaker, Lex, Comprehend, Lambda, ECS, S3), Python, SQL, PyTorch, TensorFlow, Scikit-learn, BERT, Transformers, Docker, Kubernetes, CI/CD, PostgreSQL
• Development & Monitoring Tools:	Git, GitHub Actions, MLFlow, Prefect, Prometheus, Grafana, Power BI, Matplotlib, Seaborn, ETL/ELT Pipelines

PROFESSIONAL EXPERIENCE

Istidama ConsultingAmman, Jordan (Hybrid) | March 2026 – Present

Lead Technical Instructor

- Direct an intensive AI and Data Science bootcamp, managing end-to-end delivery of a multi-module curriculum covering the machine learning lifecycle from data engineering to production deployment.
- Oversee technical instruction and project execution across advanced NLP and LLM architectures, including Transformer fine-tuning (BERT, RoBERTa, GPT), RAG vector retrieval systems (Weaviate), and sparse/dense retrieval models.
- Manage technical modules on data engineering and analytics, directing hands-on training in complex SQL (CTEs, Window Functions), automated Python ETL pipelines, and relational/graph database architectures (PostgreSQL, Fuseki).
- Establish MLOps delivery standards, guiding teams through Docker containerization, FastAPI backend deployment, Git branching workflows, and automated system evaluation (monitoring latency and error rates).
- Mentor cross-functional student project teams on product framing, scope definition, KPI tracking, and full-stack AI platform integration with Next.js frontends.

YGA Upskilling ProgramAmman, Jordan (Remote/Hybrid) | October 2025 – March 2026

English and Technical Communications Instructor

- Designed a specialized ESP (English for Specific Purposes) curriculum for QA testers and Generative AI cohorts, focusing on standard operating documentation and cross-functional agile communication.
- Facilitated high-impact professional development workshops covering technical bug reporting, prompt engineering articulation, and stakeholder presentation strategies.
- Bridged the operational gap between technical teams and workplace integration by coaching engineers and testers on cross-functional collaboration protocols and client communication etiquette.

HubinIT

Remote | July 2024 – May 2025

AI Delivery Lead

- Orchestrated the multi-module product delivery of an enterprise AI Employee platform on AWS Fargate, Bedrock, and Comprehend, managing integration across ethics & compliance, customer service, finance, legal, and sales domains.
- Spearheaded the design and governance strategy for an AI Ethics & Compliance Platform, ensuring automated alignment with international regulatory jurisdictions and corporate data standards.
- Managed context-aware retrieval architecture implementations using Amazon Kendra, OpenSearch, and DynamoDB for automated financial forecasting, legal analysis, and support systems.
- Directed serverless microservice architecture deployments on AWS Fargate, establishing strict IAM role-based access control policies, container security, and data encryption standards.
- Streamlined workflow automation by integrating multi-service AI capabilities including Textract document processing, Comprehend sentiment analysis, and SageMaker predictive analytics.
- Managed Amazon ECS container orchestration and ECR registries, overseeing deployment pipelines with automated health monitoring and dynamic auto-scaling rules.
- Defined cross-module integration standards, architectural documentation, and system configurations, resulting in significantly enhanced platform stability and maintainability.

Amideast Jordan

Amman, Jordan | October 2024 – Present

ESL Instructor

- Crafted specialized business English curricula tailored to technical communication and documentation standards for tech industry professionals.
- Implemented data-driven assessment methodologies to track learning progress using quantifiable metrics and performance evaluations.
- Collaborated cross-functionally with subject matter experts to design target training modules for corporate clients.

Omdena

Remote | February 2022 – April 2024

AI Project Manager & Machine Learning Engineer

- Led cross-functional international teams to streamline AI solution delivery processes, reducing overall project development timelines by 25%.
- Engineered a conversational AI emotion detection system utilizing transformer architecture, achieving a 20% increase in user satisfaction metrics.
- Managed project lifecycle for LATAM disinformation detection platform, improving fake news classification accuracy by 15% through BERT and XGBoost model ensembling.
- Executed end-to-end ML project management from data ingestion and model training to deployment across 5+ client-facing applications.

Omdena

Remote | July 2023 – April 2024

Technical Documentation Specialist & Community Operations Manager

- Generated comprehensive technical documentation and system architecture guides for AI/ML platforms, increasing overall developer onboarding and adoption by 20%.
- Spearheaded community content initiatives and technical workshops, driving a 30% growth in member engagement.
- Analyzed community operational metrics to identify growth bottlenecks, implementing retention programs that increased member retention by 15%.

Al Hussein Technical University

Amman, Jordan | February 2018 – May 2024

English Lecturer

- Designed technology-enhanced communication curricula for university engineering courses, incorporating data analytics to track acquisition metrics.
- Developed performance evaluation frameworks utilizing statistical methods to measure performance and customize educational interventions.
- Led cross-faculty initiatives reaching 20+ educators to roll out innovative technical training methodologies, enhancing student engagement.
- Created interactive digital course materials integrating technical domain vocabulary, bridging language skills with technical career readiness.

LEADERSHIP EXPERIENCE

HubinIT <i>Intern Engineering Team Lead</i>	Remote July 2024 – Present
- Directed a team of 7 AI engineering interns in building enterprise-scale AI solutions from conceptual design to production deployment. - Coordinated cross-functional project deliverables involving AWS cloud architecture and automated MLOps implementation pipelines. - Established engineering code review workflows and documentation standards, improving development sprint velocity by 20%. - Organized weekly technical knowledge-sharing and alignment sessions reaching 15+ cross-departmental team members.	

Omdena <i>Jordan Chapter Lead & Project Director</i>	Remote September 2022 – April 2024
- Led community building and technical delivery workshops for 100+ AI practitioners across the Middle East region. - Managed 7+ end-to-end AI/ML production projects from scope definition to production deployment with cross-functional remote teams. - Mentored 7+ junior developers on ML engineering standards, cloud infrastructure management, and project execution best practices.	

KEY PROJECTS HANDLED

Enterprise AI Virtual Employee Platform HubinIT	
- Managed delivery of a multi-intent conversational system utilizing AWS Lex across 5 business workflows (financial forecasting, legal compliance, sales analytics, customer service, and ethics monitoring). - Architected document processing workflows using AWS Textract and Comprehend for automated legal and financial compliance extraction. - Directed foundation model integrations via AWS Bedrock for specialized domain reasoning, supported by custom knowledge retrieval.	
AI/ML Production Solution Portfolio Omdena	
LATAM Fake News Detector: Managed development of political disinformation system achieving 87% accuracy using BERT + XGBoost. Medical Imaging Analysis: Directed CNN-based cancer detection project achieving 92% accuracy and cutting diagnostic time by 30%. Therapeutic Conversation Agent: Delivered mental health chatbot featuring 85% emotion detection accuracy and multilingual capability. Emotion Recognition System: Managed human-robot interaction project enhancing empathy evaluation metrics by 20%. Cardiac Prediction System: Led edge-optimized wearable platform development, achieving 90% prediction accuracy while reducing false positives by 15%.	

EDUCATION

University of Maine at Presque Isle Presque Isle, Maine <i>Bachelor of Liberal Studies (BLS) with Project Management Minor</i>	Expected Spring 1
International University of Applied Sciences Bad Honnef, Germany <i>BSc Applied Artificial Intelligence</i>	Expected December 2026
Islamic University of Minnesota Bloomington, Minnesota <i>MSc Computer Science</i>	May 2022
Islamic University of Minnesota Bloomington, Minnesota <i>BA Islamic Studies</i>	August 2017
